How to use this booklet

1 Each lesson is **one double-sided sheet** with six steps: **Easy** steps 1–2, **Medium** steps 3–4 and **Challenging** steps 5–6. Write your name at the top.

2 Each step starts with a **HOW TO** box and a worked example. The **speech bubble** tells you what to do.

WE DO Your teacher works these examples on the board. **Copy every step** onto the lines.

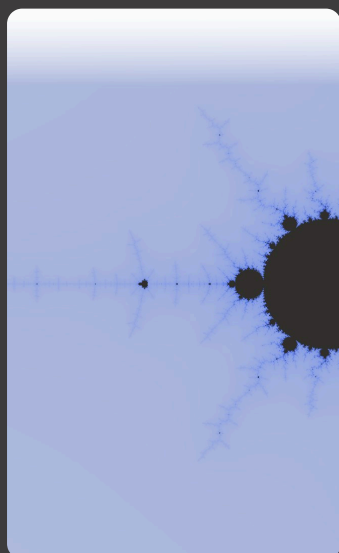

YOU DO Your turn. The first question is done for you, the next has the answer missing, then only the numbers are missing. Then it is all yours.

About the artwork

The pictures in this booklet are parts of the **Mandelbrot set**, drawn by a computer that repeats one simple rule, $z \rightarrow z^2 + c$, thousands of times for every point. Every booklet shows a different part of the set: this one is the long antenna of the set along the negative real axis, dotted with tiny copies of the whole set. Maths can make beautiful things.
