11 lessons · one lesson for each exercise · each lesson is one hour

NSW syllabus outcome

Stage 4 Number and algebra: MA4-FRC-C-01 represents and operates with fractions, decimals and percentages to solve problems.

CHAPTER

7

7.01 Ordering decimals

7.02 Decimals and fractions

7.03 Adding and subtracting decimals

7.04 Multiplying and dividing by powers of 10

7.05 Using a known product

7.06 Multiplying decimals

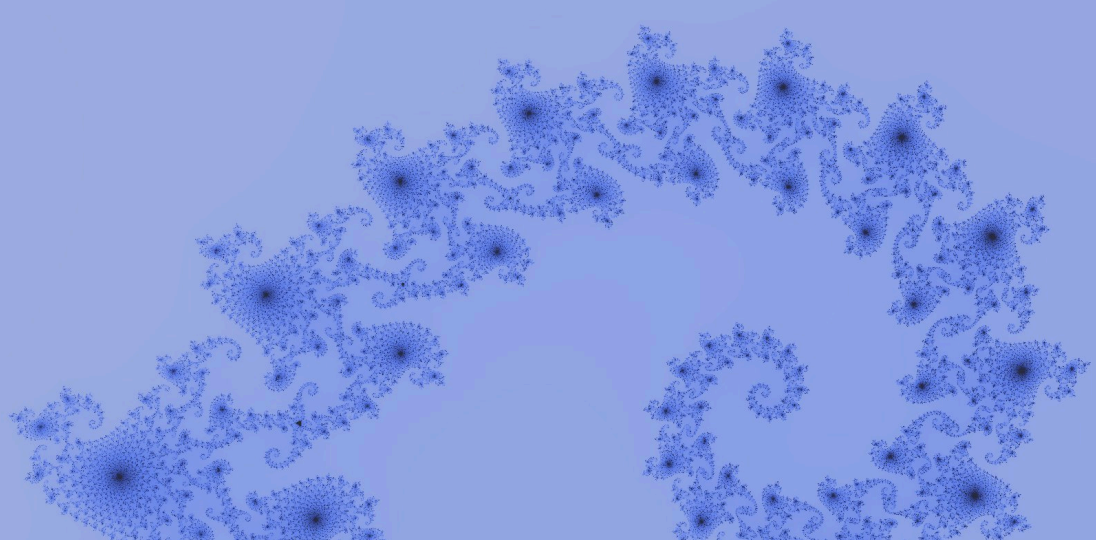

7.07 Dividing decimals by whole numbers

7.08 Dividing by a decimal

7.11 Decimals and money

How to use this booklet

1 Each lesson is **one hour**. Start with the **learning intentions** and **success criteria**, write the **key terms** and use the **notes** box.

WE DO **Grey boxes.** Your teacher works each example (parts a, b, c) on the board. **Copy every step** into the space.

2 Every lesson has three levels: **Easy**, then **Medium**, then **Challenging**. Work down the page: the questions get harder as you go.

YOU DO **Blue boxes.** Now it is your turn. Work on your own. Quick drill answers go on the line; show working in the boxes.

DRILL **Skill drill pages.** After the Easy and the Medium examples there is a full page of short practice questions. Work down the page, write answers on the lines, then mark it and record your score and time.

3 Finished early? Try the **extension**. At the end, **show off your skill** on the tear-off exit ticket and hand it in.

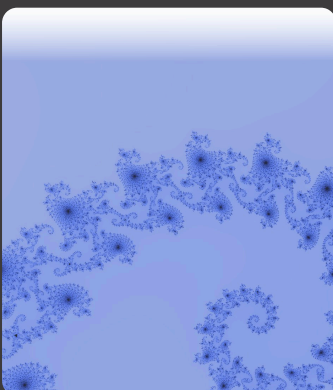

4 Missed a lesson? Each lesson ends with a **summary** with a worked example for every level. Start there.

In this chapter you will

- order decimals
- convert between decimals and fractions
- add, subtract, multiply and divide decimals
- multiply and divide by powers of 10
- round decimals and write recurring decimals
- solve money problems

About the artwork

The pictures in this booklet are parts of the **Mandelbrot set**, drawn by a computer that repeats one simple rule, $z \rightarrow z^2 + c$, thousands of times for every point. Every booklet shows a different part of the set: this one is a double spiral deep inside Seahorse Valley. Maths can make beautiful things.

Ordering decimals

Date _____

Learning intentions

We are learning to:

- compare and order decimals

Success criteria

I can:

- ☐ use place value to compare decimals
- ☐ fill with zeros so decimals have the same number of places
- ☐ arrange decimals in ascending and descending order

Key terms Write the definition as your teacher explains it.

Example 2

Write the place value, then order the decimals.

a Write the place value of 8 in 12.084.

Your teacher works this out. Copy every step.

b Arrange 34.98, 36.86, 3.998, 38.141, 340, 34.89 in ascending order.

Your teacher works this out. Copy every step.

YOU DO

On your own: **Medium** practise the skill. Work down the page, one round at a time. Write each answer on its line.

16 QUESTIONS

REMEMBER Fill empty places with zeros.

ROUND 1

Questions 1–8: write the decimals in ascending order (smallest first).

1 1.34, 1.579, 1.85, 1.4

2 2.8, 2.15, 2.685, 2.89

3 3.8, 3.72, 3.965, 3.64
