How to use this booklet

- Each lesson is **one double-sided sheet**. Write your name, class and date at the top.
- Then work down the **columns**, left to right. They get harder as you go: **Easy** **Easy** **Medium** on page 1, then **Medium** **Challenging** **Challenging** on page 2.
- Most questions practise **today's skill**. A question marked **from 1.03** comes from an earlier lesson, to keep it fresh. Stuck? Look back at that lesson.
- Each question tells you what to do: read it carefully. Show your working on the lines. The first question with working in each Easy column shows you how to set it out.

In this chapter you will

- round and estimate
- multiply and divide whole numbers
- use divisibility tests
- use long division and Roman numerals
- use index notation, square roots and cube roots
- find prime numbers and prime factors
- find the HCF and LCM of two numbers

About the artwork

The pictures in this booklet are parts of the **Mandelbrot set**, drawn by a computer that repeats one simple rule, $z \rightarrow z^2 + c$, thousands of times for every point. Every booklet shows a different part of the set: this one is the tentacled edge of a small copy of the whole set, out on the antenna near -1.77 . Maths can make beautiful things.

KEY IDEA

To round, look at the digit to the right of the place you are rounding to: 5 or more, round up; 4 or less, round down. To estimate, round each number to its first digit, then work it out.

E1 Round 6 482 to the nearest hundred.

E2 Estimate 389×52 .

E3 27 students each pay \$48. Estimate the total.

Easy

Questions 1–9

1 Round 1 531 to the nearest hundred.

2 Round 9 106 to its first digit.

3 Is 2 240 closer to 2 000 or 3 000?

4 Round 796 to the nearest ten.

5 Round 708 to its first digit.

6 Is 2 190 closer to 2 000 or 3 000?

7 Round 274 to the nearest ten.

8 Round 879 to its first digit.

9 $3 - (-3)$

- 34 Estimate $5\,116 \div 78$.

- 35 $14 + (-31)$

from 1.04

- 36 Round 20 961 to the nearest thousand.

Challenging

Questions 37–45

- 37 26 students each pay \$37 for an excursion. Estimate the total cost.

- 38 783 people travel in 25 buses. About how many are on each bus?

- 39 To draw a reflex angle of 315° , what angle do you draw first?

from 2.02

- 40 Ruby says $661 \times 16 = 105\,760$. Use an estimate to check. Is it reasonable?

- 41 Co-interior angles are $2x^{\circ}$ and 142° . Find x so that $AB \parallel CD$.

from 2.11

- 42 What is the smallest whole number that rounds to 300 (to the nearest hundred)?

- 43 24 students each pay \$16 for an excursion. Estimate the total cost.

- 44 $-40 \div (-8)$

from 1.07

- 45 822 people travel in 22 buses. About how many are on each bus?

Challenging

Questions 46–54

- 46 732 people travel in 33 buses. About how many are on each bus?

- 47 What is the largest whole number that rounds to 400 (to the nearest hundred)?

- 48 The lines are parallel. An angle is 58° . What is its corresponding angle?

from 2.07

- 49 40 students each pay \$31 for an excursion. Estimate the total cost.

- 50 $-3 \times (-2) \times 3$

from 1.06

- 51 Estimate $8\,174 - 4\,673$.

- 52 359 people travel in 31 buses. About how many are on each bus?

- 53 Find the supplement of 69° .
