

Year 7 · Lesson 10.01 Interpreting graphs: answers (teacher copy)

10.01 Interpreting graphs (booklet p. 3)

Warm-up

1. 40
2. 15
3. 30
4. 20%

WE DO examples

1. Ex 1: $4\frac{1}{2}$ symbols = 18 books
2. Ex 2: $20 - 8 = 12$ more books
3. Ex 3: $\frac{1}{2}$, so 40 students
4. Ex 4: July (9°C); June is $19 - 11 = 8^{\circ}\text{C}$ colder than March
5. Ex 5: $24\% + 28\% = 52\%$; 52% of 5000 = 2600
6. Ex 6: 55%. 20 years ago there was little or no streaming; CDs, radio and downloads were much bigger

Set A

1. 4 books
2. 2 books
3. 12
4. 8
5. 14
6. Thursday
7. Wednesday
8. 2
9. $12 + 18 = 30$
10. 4 symbols

Set B

1. 6
2. 2
3. Swimming
4. Fishing
5. Beach cricket
6. 3
7. $8 - 2 = 6$
8. $6 + 2 = 8$
9. 28
10. 1 student

Set C

1. Bus
2. About 20 (a quarter)
3. About 10 (an eighth)
4. True (6)
5. $80 - 40 = 40$
6. January and February, 20°C
7. Jan and Feb (20°C), Mar and Dec (19°C) or May and Sep (12°C)
8. October
9. October to November ($+3^{\circ}\text{C}$)
10. April to May (-4°C)

Set D

1. 28%
2. $18\% + 10\% = 28\%$
3. 18% of 5000 = 900
4. $7\frac{1}{2}$ symbols
5. e.g. retirees move to the coast; young people leave for work or uni
6. Streaming and radio ($55\% + 20\%$)
7. $20\% = \frac{1}{5}$
8. 10% of 400 = 40
9. 35% of 400 = 140
10. e.g. even more streaming, fewer CDs, less radio

Extension

1. $60/360 = \frac{1}{6}$; $\frac{1}{6}$ of 240 = 40
2. $45/180 = \frac{1}{4}$; $\frac{1}{4}$ of $360^{\circ} = 90^{\circ}$
3. $3\frac{3}{4} \times 8 = 30$ students; $20 \div 8 = 2\frac{1}{2}$ symbols

Exit ticket

1. Level 1: 6
2. Level 2: 9/25
3. Level 3: $5/25 = 20\%$; 20% of 200 = 40
