KINGSCLIFF HIGH SCHOOL
ACHIEVEMENT THROUGH ENDEAVOUR

YEAR 10 TRANSITION

CHAPTER 4

YEAR 10 MATHEMATICS

Statistics

7 lessons · two pages each · Easy, then Medium

- 4.1 Types of data
- 4.2 Frequency tables
- 4.3 Histograms
- 4.4 Mean, median, mode and range
- 4.5 Stem-and-leaf plots
- 4.6 Symmetrical or skewed
- 4.7 Time-series graphs

NAME _____ CLASS _____ TEACHER _____

Artwork: a band of gold triple spirals on the edge of the lower bulb, coloured in gold and green, part of the Mandelbrot set.

How to use this booklet

1. Each lesson is **two pages**. Read the **learning intention** and tick each **success criterion** when you can do it.

2. Page 1 is **Easy** and page 2 is **Medium**. Each page starts with an example, then questions for you.

WE DO **Grey boxes.** Your teacher works each example on the board. **Copy every step** into the space.

YOU DO **Blue boxes.** Your turn. Work down the box one round at a time. Answers go on the line; show working in the boxes.

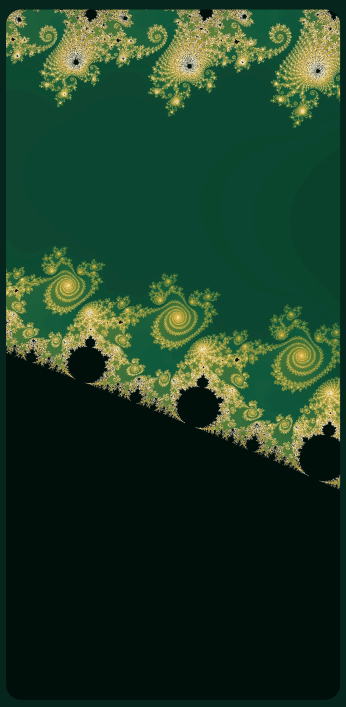

3. Stuck? Read the **Remember** line at the top of the blue box, then look back at the example you copied.

Contents and progress tracker

Lesson	Topic	Page	Date	Done
4.1	Types of data	3		☐
4.2	Frequency tables	5		☐
4.3	Histograms	7		☐
4.4	Mean, median, mode and range	9		☐
4.5	Stem-and-leaf plots	11		☐
4.6	Symmetrical or skewed	13		☐
4.7	Time-series graphs	15		☐

In this chapter you will

- sort data into categorical and numerical, and name each type
- organise data in frequency tables with class intervals and percentage frequency
- read and draw histograms
- find the mean, median, mode and range
- read and draw stem-and-leaf plots
- describe data as symmetrical or skewed
- read time-series graphs and describe trends

About the artwork

The pictures in this booklet are parts of the **Mandelbrot set**, drawn by a computer that repeats one simple rule, $z \to z^2 + c$, thousands of times for every point. Every booklet shows a different part of the set: this one is a band of gold triple spirals on the edge of the lower bulb, coloured in gold and green. Maths can make beautiful things.

Acknowledgement of Country

We acknowledge the Bundjalung people, the Traditional Custodians of the land on which Kingscliff High School stands, and pay our respects to Elders past and present.

LESSON 4.1

Types of data

Date _____

Learning intention
We are learning to sort data into categorical and numerical, and name each type.

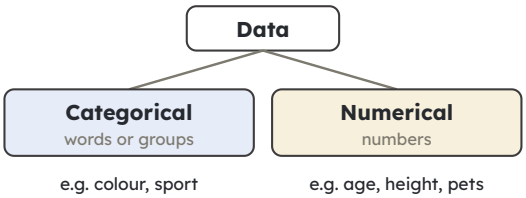

Success criteria
- ☐ I can tell categorical data from numerical data
- ☐ I can tell nominal data from ordinal data
- ☐ I can tell discrete data from continuous data

Level 1 · Getting started

Easy · 12 questions

WE DO With your teacher: copy what they write on the board.

Example 1 **Categorical data are words or groups. Numerical data are numbers you count or measure.**

a What is your favourite colour?

b How many pets do you have?

c How tall are you?

d What type of phone do you have?

YOU DO On your own: **Easy** work down the box, one round at a time. Write each answer on its line.

12 QUESTIONS

REMEMBER Answers are words or groups (red, dog, bus) → categorical · Answers are numbers you count or measure (3 pets, 152 cm) → numerical.

ROUND 1 Questions 1–4: a survey question and some answers. Is the data categorical or numerical?

1 "What is your favourite sport?" — soccer, netball, AFL

2 "How many brothers and sisters do you have?" — 0, 1, 2, 3

3 "What colour is your hair?" — brown, black, red

4 "How long is your trip to school?" — 5 min, 12 min, 20 min

Type: _____ Type: _____ Type: _____ Type: _____

ROUND 2 Questions 5–8: some data. Is it categorical or numerical?

5 Shoe sizes — 7, 8, 8, 9, 10

6 Pets — dog, cat, fish, dog

7 Temperatures — 21 °C, 24 °C, 19 °C

8 How students get to school — bus, walk, car, bus

Type: _____ Type: _____ Type: _____ Type: _____

ROUND 3 Questions 9–12: what kind of data would you collect? Categorical or numerical?

9 Colours of cars in the car park — white, red, …

10 Heights of plants — in cm

11 Favourite kinds of music — pop, rock, …

12 Goals scored in each game — 0, 1, 2, …

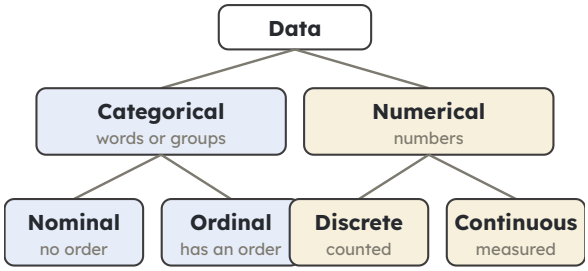

Type: _____ Type: _____ Type: _____ Type: _____

Level 2 · Building up

Medium · 14 questions

WE DO With your teacher: copy what they write on the board.

Example 2 **Categorical data can be nominal or ordinal. Numerical data can be discrete or continuous.**

a What is your favourite sport to play?

b What size drink: small, medium or large?

c How many cars does your family have?

d How long do you take to run 100 m?

YOU DO On your own: **Medium** work down the box, one round at a time. Write each answer on its line (show working in the boxes). 14 QUESTIONS

REMEMBER Nominal: groups with no order · Ordinal: groups with an order (small, medium, large) · Discrete: counted (whole numbers) · Continuous: measured (can have decimals).

ROUND 1 Questions 1–4: categorical data. Nominal or ordinal?

1 "What colour are your eyes?" — brown, blue, green

2 "How was the movie?" — poor, OK, good, great

3 "Which country were you born in?" — Australia, Fiji, …

4 "What size T-shirt do you wear?" — S, M, L, XL

Type: _____ Type: _____ Type: _____ Type: _____

ROUND 2 Questions 5–8: numerical data. Discrete or continuous?

5 "How many texts did you send today?" — 4, 15, 30

6 Mass of newborn babies — 3.2 kg, 3.65 kg

7 Number of people on a bus — 12, 25, 40

8 Lengths of fish caught — 31.5 cm, 40 cm

Type: _____ Type: _____ Type: _____ Type: _____

ROUND 3 Questions 9–12: name both: categorical or numerical, then the kind.

9 "How hot do you like your curry?" — mild, medium, hot

10 Heights of trees — in metres

11 "What is your favourite pizza topping?" — ham, cheese, …

12 Number of goals scored — 0, 1, 2, …

_____ _____ _____ _____

ROUND 4 Questions 13–14: solve each problem.

13 Write a survey question that gives numerical, discrete data.

14 A survey asks: "How happy are you with the canteen? Not happy, OK, very happy." What type of data is this? Explain.

LESSON 4.2

Frequency tables

Date _____

Learning intention
We are learning to organise data in frequency tables.

Success criteria
- ☐ I can use tally marks to count data
- ☐ I can complete a frequency table and read it
- ☐ I can group data into classes and find percentages

Level 1 · Getting started

Easy · 12 questions

WE DO With your teacher: copy what they write on the board.

Example 1 **Count each answer with tally marks (a stroke for each one, every fifth crosses four). Frequency = how many.**

Favourite fruit of 16 students
apple, banana, apple, grapes, mango, apple, banana, mango, apple, grapes, banana, apple, mango, apple, banana, apple

Fruit	Tally	Frequency
apple		
banana		
grapes		
mango		
Total		

a Complete the tally column.

b Complete the frequency column.

c Which fruit is the most popular?

d Check: add the frequencies. How many students?

YOU DO On your own: **Easy** work down the box, one round at a time. Write each answer on its line.

12 QUESTIONS

REMEMBER Frequency = the number of tally marks · Total frequency = the number of values.

ROUND 1 **Questions 1–6: use the data. Make a tally, then answer.**

Number of pets of 20 students
0, 1, 2, 1, 0, 3, 1, 2, 1, 1, 0, 2, 4, 1, 2, 1, 0, 1, 3, 1

Pets	Tally	Frequency
0		
1		
2		
3		
4		
Total		

1. How many students have 0 pets?
2. How many students have 1 pet?
3. How many students have 2 pets?
4. How many students have 3 or more pets?
5. What is the most common number of pets?
6. What is the total frequency?

ROUND 2 **Questions 7–12: use the tally table of favourite sports.**

Sport	Tally	Frequency
Soccer	𝍸 ||	
Netball	𝍸 ||||	
AFL	||||	
Cricket	|||	
Swimming	||	

7. Frequency of netball?
8. Frequency of AFL?
9. Which sport is the most popular?
10. Which sport is the least popular?
11. How many students were asked?
12. How many more chose soccer than cricket?

Level 2 · Building up

Medium · 14 questions

WE DO With your teacher: copy what they write on the board.

Example 2 **Group numbers into class intervals. Percentage frequency = frequency ÷ total × 100.**

Hours of TV watched by 16 people
6, 5, 11, 13, 24, 8, 1, 12, 7, 6, 14, 10, 9, 16, 8, 3

Hours	Tally	Frequency	%
0–4			
5–9			
10–14			
15–19			
20–24			
Total			

a Complete the tally column.

b Complete the frequency column and the total.

c Find the percentage frequency of each class.

d Which class has the most people?

YOU DO On your own: **Medium** work down the box, one round at a time. Write each answer on its line (show working in the boxes). 14 QUESTIONS

REMEMBER Class 10–19 means 10 up to 19 · Percentage frequency = frequency ÷ total × 100 · The percentages add up to 100%.

ROUND 1 **Questions 1–6: group the test marks (out of 50) into classes, then answer.**

Test marks of 20 students
23, 41, 35, 18, 29, 44, 37, 26, 31, 9, 38, 45, 33, 27, 36, 15, 39, 42, 28, 34

Mark	Tally	Frequency
0–9		
10–19		
20–29		
30–39		
40–49		
Total		

1. Frequency of 0–9?
2. Frequency of 20–29?
3. Frequency of 30–39?
4. Which class has the most students?
5. How many students scored 40 or more?
6. How many scored less than 20?

ROUND 2 **Questions 7–12: find the percentage frequency of each class of ages (total 25).**

Age	Frequency	%
10–14	3	
15–19	6	
20–24	8	
25–29	5	
30–34	3	
Total	25	

7. % aged 10–14?
8. % aged 15–19?
9. % aged 20–24?
10. % aged 25–29?
11. % aged 30–34?
12. All the % added up?

ROUND 3 **Questions 13–14: solve each problem. Show your working.**

13. In a survey of 30 people, 9 said they walk to school. What percentage frequency is this?

14. Ella groups the ages 12, 25, 31, 18, 22, 27, 35, 14, 29, 20 into classes 10–19, 20–29 and 30–39. What is the frequency of each class?

LESSON 4.3

Histograms

Date _____

Learning intention
We are learning to read a histogram, and draw one from a frequency table.

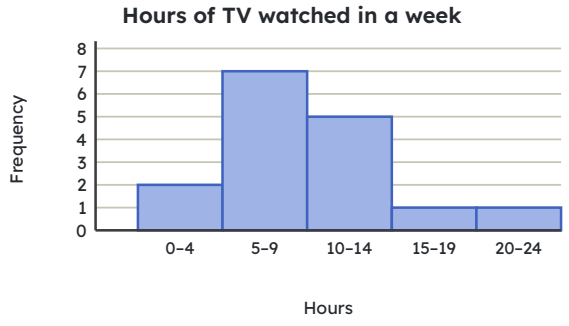

Success criteria
- ☐ I can read the frequency of a class from a histogram
- ☐ I can find the most common class and the total
- ☐ I can draw a histogram and find percentage frequencies

Level 1 · Getting started

Easy · 12 questions

WE DO With your teacher: copy what they write on the board.

Example 1 A histogram is a column graph for class intervals. Its columns touch.

a How many people watched 5–9 hours?

b Which class is the most common?

c How many people were surveyed?

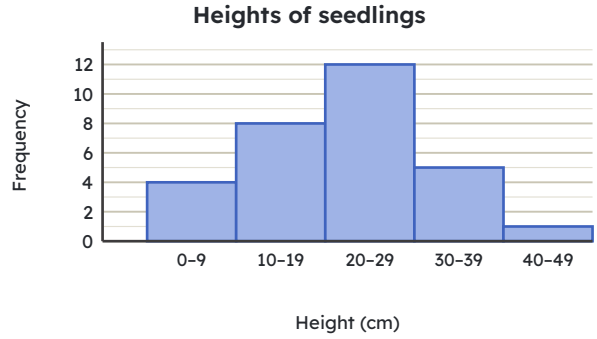

d How many people watched 10 hours or more?

YOU DO On your own: **Easy** work down the box, one round at a time. Write each answer on its line.

12 QUESTIONS

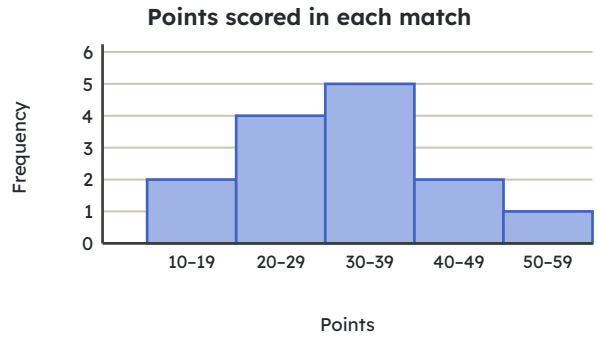

REMEMBER Read across from the top of a column to the frequency axis · Total = add up all the columns · "10 or more" = add the columns from 10 up.

ROUND 1 Questions 1–6: use the histogram of seedling heights.

1. How many seedlings are 10–19 cm?
2. How many seedlings are 30–39 cm?
3. Which class has the most seedlings?
4. Which class has the fewest seedlings?
5. How many seedlings are there in total?
6. How many seedlings are 30 cm or taller?

ROUND 2 Questions 7–12: use the histogram of points scored by a basketball team.

7. How many matches had 20–29 points?
8. How many matches had 40–49 points?
9. Which class is the most common?
10. How many matches did the team play?
11. How many matches had fewer than 30 points?
12. How many matches had 40 points or more?

Level 2 · Building up

Medium · 12 questions

WE DO With your teacher: copy what they write on the board.

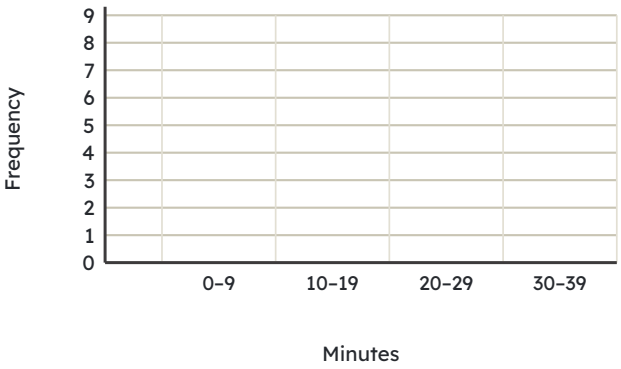

Example 2 **Minutes taken to walk to school. Percentage frequency = frequency ÷ total × 100.**

a Find the total, then the percentage frequency of each class.

Minutes	Frequency	Percentage frequency
0–9	6	
10–19	8	
20–29	4	
30–39	2	
Total		

Your teacher works this out. Copy every step.

b Draw the histogram.

YOU DO On your own: **Medium** work down the box, one round at a time. Write each answer on its line (show working in the boxes). 12 QUESTIONS

REMEMBER Percentage frequency = frequency ÷ total × 100 · Draw a histogram: label both axes, columns touch, leave a half-column gap at the start.

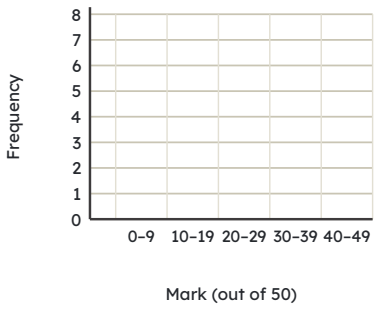

ROUND 1 Questions 1–8: find each percentage frequency (frequency ÷ total × 100).

1. 5 out of 20
2. 3 out of 10
3. 8 out of 40
4. 6 out of 25
5. 18 out of 30
6. 12 out of 50
7. 7 out of 20
8. 4 out of 16

ROUND 2 Questions 9–10: draw each histogram on its grid.

9. Draw a histogram for the table. Then name the most common class.

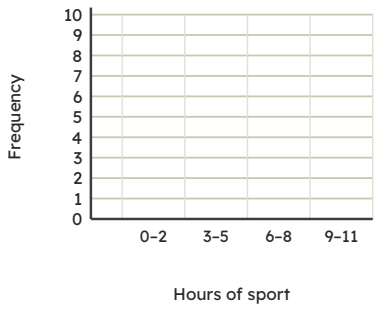

Mark	Frequency
0–9	1
10–19	3
20–29	6
30–39	7
40–49	3
Total	**20**

Most common: _____

10. Draw a histogram for the table. Then name the most common class.

Hours	Frequency
0–2	5
3–5	9
6–8	4
9–11	2
Total	**20**

Most common: _____

ROUND 3 Questions 11–12: solve each problem. Show your working.

11. 16 people were asked how many hours of TV they watch. 4 of them said 0–4 hours. What percentage is this?

12. The columns of a histogram are 3, 8, 6, 3 high. How many values are there? What percentage are in the tallest column?

LESSON 4.4

Mean, median, mode and range

Date _____

Learning intention
We are learning to find the mean, median, mode and range of a set of data.

Success criteria
- ☐ I can find the mean, the mode and the range
- ☐ I can find the median of an odd or even number of values
- ☐ I can explain how an outlier changes the mean

Level 1 · Getting started

Easy · 12 questions

WE DO With your teacher: copy what they write on the board.

Example 1 **Data: 3, 7, 5, 7, 8. Put the values in order first for the median.**

a Find the mean.

b Find the median.

c Find the mode.

d Find the range.

YOU DO On your own: **Easy** work down the box, one round at a time. Write each answer on its line (show working in the boxes). 12 QUESTIONS

REMEMBER Mean = total ÷ number of values · Median = the middle value in order · Mode = the most common · Range = highest − lowest.

ROUND 1 Questions 1–4: find the mean of each set.

1. 2, 4, 6
2. 5, 5, 8, 2
3. 10, 20, 30, 40, 50
4. 1, 3, 5, 7, 9

ROUND 2 Questions 5–8: put each set in order, then find the median.

5. 3, 9, 1, 7, 5
6. 12, 4, 8
7. 6, 2, 9, 4, 7
8. 15, 11, 20, 13, 18

ROUND 3 Questions 9–12: find the mode and the range of each set.

9. 4, 2, 4, 8, 6
10. 9, 3, 9, 5, 1
11. 7, 7, 2, 10, 4
12. 12, 15, 12, 18, 11

Level 2 · Building up

Medium · 12 questions

WE DO With your teacher: copy what they write on the board.

Example 2 **With an even number of values, the median is halfway between the two middle values.**

a Find the mean and the range of 2, 4, 3, 5, 10, 6.

b Find the median of 29, 12, 18, 26, 15, 22.

c Ages of 13 adults: 40, 41, 37, 32, 48, 43, 32, 76, 29, 33, 26, 38, 87. Find the mean (1 d.p.) and the median.

d Why is the mean age bigger than the median age in c?

YOU DO On your own: **Medium** work down the box, one round at a time. Write each answer on its line (show working in the boxes).

12 QUESTIONS

REMEMBER Even number of values: median = (two middle values added) ÷ 2 · Round the mean to 1 decimal place · An outlier (a very high or low value) pulls the mean towards it.

ROUND 1 Questions 1–4: an even number of values. Find each median.

1. 3, 8, 5, 10
2. 12, 4, 9, 7
3. 20, 14, 18, 11, 16, 25
4. 1, 6, 2, 9, 5, 8

ROUND 2 Questions 5–8: find each mean, to 1 decimal place.

5. 3, 5, 6
6. 10, 12, 15, 14
7. 2, 9, 4, 8, 5, 3
8. 21, 18, 25, 30, 16, 27

ROUND 3 Questions 9–10: each set has an outlier. Find the mean and median. Which is better?

9. 5, 6, 7, 8, 49
10. 30, 32, 35, 35, 38, 90

ROUND 4 Questions 11–12: solve each problem. Show your working.

11. Jo's quiz scores were 2, 7, 4, 8, 3, 6, 5. Find the mean, the median and the range.
12. The mean of 4 test marks is 15. Three of the marks are 12, 18, 14. What is the fourth mark?

LESSON 4.5

Stem-and-leaf plots

Date _____

Learning intention
We are learning to read and draw stem-and-leaf plots, and use them to find statistics.

Success criteria
- ☐ I can read the values in a stem-and-leaf plot
- ☐ I can draw an ordered stem-and-leaf plot
- ☐ I can find the median and range from a plot

Level 1 · Getting started

Easy · 12 questions

WE DO With your teacher: copy what they write on the board.

Example 1 The stem is the tens digit, the leaf is the units digit. The key shows how to read it.

Scores

Stem	Leaf
2	4 9
3	1 1 7 8
4	2 4 6
5	0 4

Key: 2 | 4 = 24

a Write the values in the row with stem 3.

b What is the smallest value?

c What is the mode?

d How many values are there?

YOU DO On your own: **Easy** work down the box, one round at a time. Write each answer on its line.

12 QUESTIONS

REMEMBER Join the stem and the leaf: 3 | 7 = 37 · The smallest is the first leaf, the largest is the last · Count the leaves to find how many values.

ROUND 1 Questions 1–6: use the plot of ages at a party.

Ages at a party

Stem	Leaf
1	5 8
2	0 3 3 7 9
3	1 4 6
4	2

Key: 1 | 5 = 15

1. What is the youngest age?
2. What is the oldest age?
3. What is the mode?
4. How many people are there?
5. How many people are in their 20s?
6. How many people are older than 30?

ROUND 2 Questions 7–12: use the plot of test marks.

Test marks

Stem	Leaf
5	6
6	2 5 8
7	0 3 3 3 9
8	1 4 7
9	0 5

Key: 5 | 6 = 56

7. What is the lowest mark?
8. What is the highest mark?
9. What is the mode?
10. How many students are there?
11. How many marks are 80 or more?
12. What is the range?

Level 2 · Building up

Medium · 8 questions

WE DO With your teacher: copy what they write on the board.

Example 2 **Basketball points in 14 matches: 20, 19, 24, 37, 42, 34, 38, 49, 28, 15, 38, 32, 50, 29.**

a Draw an ordered stem-and-leaf plot.

Stem	Leaf
1	
2	
3	
4	
5	

Key: ____ | ____ = ________

b Find the median.

c Find the range.

d Where do most of the scores lie?

YOU DO On your own: **Medium** work down the box, one round at a time. Write each answer on its line (show working in the boxes). 8 QUESTIONS

REMEMBER Write the stems down the side, then each leaf beside its stem, smallest to largest · Add a key · Median: count in from both ends.

ROUND 1 Questions 1–2: draw an ordered plot on each template. Then find the median and range.

1 **Ages of people at the beach**
23, 41, 35, 18, 29, 44, 37, 26, 31, 19, 38, 45

Stem	Leaf
1	
2	
3	
4	

Key: ____ | ____ = ________

Median, range: _____

2 **Minutes spent on homework**
12, 25, 31, 18, 22, 27, 35, 14, 29, 20, 33, 26

Stem	Leaf
1	
2	
3	

Key: ____ | ____ = ________

Median, range: _____

ROUND 2 Questions 3–6: use the plot of plant heights (cm).

Heights of plants (cm)

Stem	Leaf
1	2 5 8
2	0 4 4 7
3	1 3 6
4	0

Key: 1 | 2 = 12

3 How many plants are there? _____

4 What is the median height? _____

5 What is the range? _____

6 How many plants are 30 cm or taller? _____

ROUND 3 Questions 7–8: solve each problem. Show your working.

7 Flying foxes in a fig tree were counted on 14 days: 73, 50, 36, 82, 15, 24, 73, 57, 65, 86, 51, 32, 21, 39. Write the counts in order, then find the median and the range.

8 Sam says the median of 12, 15, 18, 40 is 18. Explain the mistake and find the median.

LESSON 4.6

Symmetrical or skewed

Date _____

Learning intention
We are learning to describe the shape of a set of data, and spot outliers.

Success criteria
- ☐ I can say whether a graph is symmetrical or skewed
- ☐ I can find an outlier and where most of the data lie
- ☐ I can say whether the mean or the median is bigger in skewed data

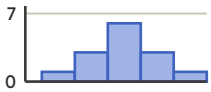

Level 1 · Getting started

Easy · 12 questions

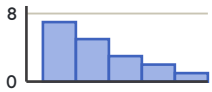

WE DO With your teacher: copy what they write on the board.

Example 1 Look at where the tail is: the side where the columns (or dots) get short and spread out.

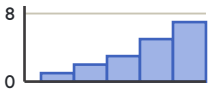

a Shape?

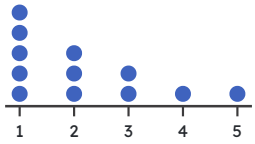

b Shape?

c Shape?

d Shape?

YOU DO On your own: Easy work down the box, one round at a time. Write each answer on its line.

12 QUESTIONS

REMEMBER Symmetrical: the two sides match · Positively skewed: the tail is on the right · Negatively skewed: the tail is on the left.

ROUND 1 Questions 1–4: name the shape of each histogram.

1

Shape: _____

2

Shape: _____

3

Shape: _____

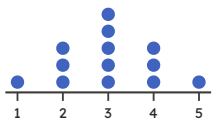

4

Shape: _____

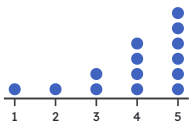

ROUND 2 Questions 5–8: name the shape of each dot plot.

5

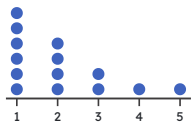

Shape: _____

6

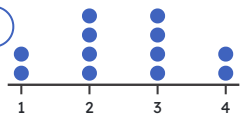

Shape: _____

7

Shape: _____

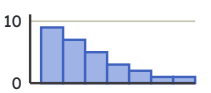

8

Shape: _____

ROUND 3 Questions 9–12: symmetrical, positively skewed or negatively skewed?

9

Shape: _____

10

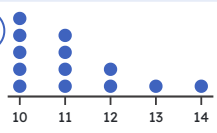

Shape: _____

11

Shape: _____

12

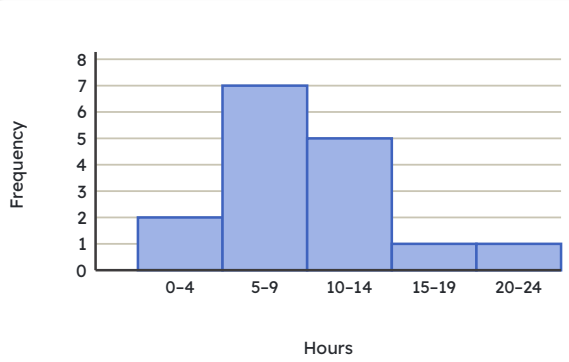

Shape: _____

Level 2 · Building up

Medium · 10 questions

WE DO With your teacher: copy what they write on the board.

Example 2 **Hours of TV watched by 16 people. Describe the shape and where most values lie.**

a Is the data symmetrical or skewed?

b Where do most of the values lie?

c The mean is 9.6 and the median is 8.5. Which is bigger?

d Why is that one bigger?

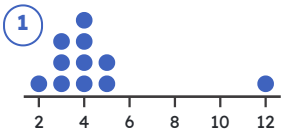

YOU DO On your own: **Medium** work down the box, one round at a time. Write each answer on its line (show working in the boxes).

10 QUESTIONS

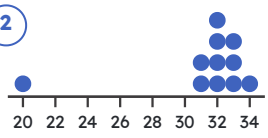

REMEMBER Describe: the shape, any outlier (a value far from the rest), and where most values lie · In positively skewed data, the mean is bigger than the median.

ROUND 1 Questions 1–4: each dot plot has an outlier. Write the outlier.

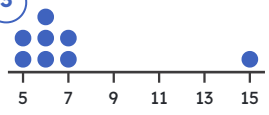

1

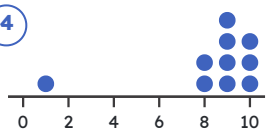

2

3

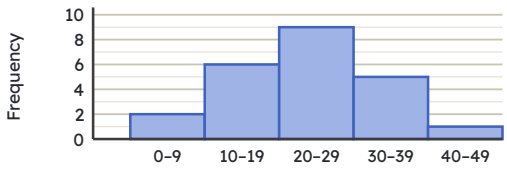

4

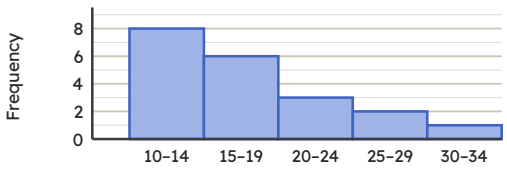

Outlier: _____ Outlier: _____ Outlier: _____ Outlier: _____

ROUND 2 Questions 5–8: name the shape and the class with the most values.

5

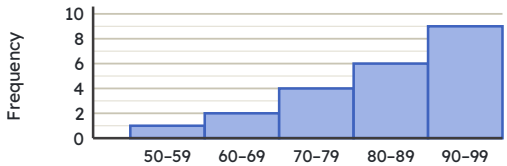

6

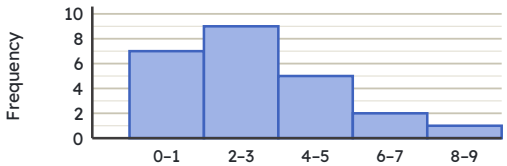

Shape, most: _____ Shape, most: _____

7

8

Shape, most: _____ Shape, most: _____

ROUND 3 Questions 9–10: solve each problem. Show your working.

9 The house prices in a town are positively skewed. Which is bigger, the mean or the median? Why?

10 The test marks were 45, 48, 50, 52, 55, 12. Which mark is the outlier? Find the mean with and without it (1 d.p.).

LESSON 4.7

Time-series graphs

Date _____

Learning intention
We are learning to read time-series graphs and describe how the data change over time.

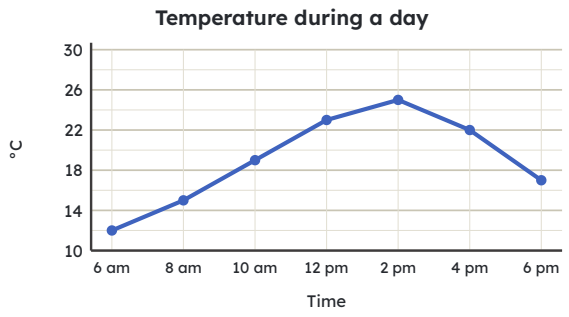

Success criteria
- ☐ I can read a value from a time-series graph
- ☐ I can find the highest and lowest values
- ☐ I can describe a trend and make a rough prediction

Level 1 · Getting started

Easy · 12 questions

WE DO With your teacher: copy what they write on the board.

Example 1 A time-series graph shows how something changes over time.

a What was the temperature at 10 am?

b What was the highest temperature? When?

c What was the lowest temperature? When?

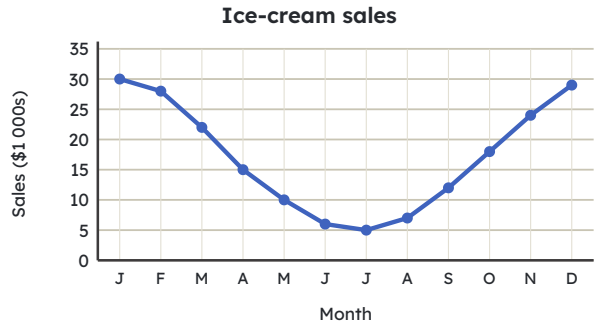

d When was the temperature 22 °C?

YOU DO On your own: **Easy** work down the box, one round at a time. Write each answer on its line.

12 QUESTIONS

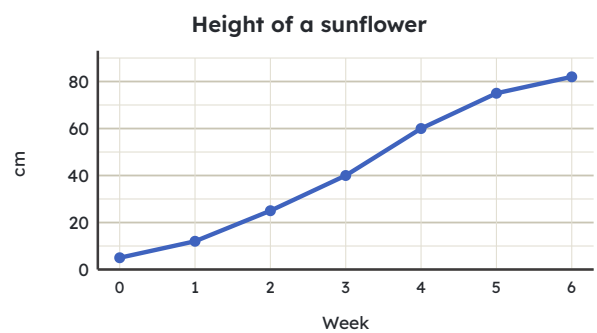

REMEMBER Find the time on the bottom axis, go up to the line, then across to read the value · The highest point is the biggest value.

ROUND 1 Questions 1–6: use the graph of ice-cream sales (in $1 000s) at a beach shop.

1. Sales in March?
2. Sales in July?
3. Which month had the highest sales?
