How to use this booklet

- 1 Each lesson is **one double-sided sheet**. Write your name, class and date at the top.
- 2 Then work down the **columns**, left to right. They get harder as you go: **Easy** **Easy** **Medium** on page 1, then **Medium** **Challenging** **Challenging** on page 2.
- 3 Most questions practise **today's skill**. A question marked **from 1.03** comes from an earlier lesson, to keep it fresh. Stuck? Look back at that lesson.
- 4 Each question tells you what to do: read it carefully. Show your working on the lines. The first question with working in each Easy column shows you how to set it out.

WE DO

The grey box at the top. Your teacher shows the key idea with two or three examples. **Copy every step** into the space.

About the artwork

The pictures in this booklet are parts of the **Mandelbrot set**, drawn by a computer that repeats one simple rule, $z \rightarrow z^2 + c$, thousands of times for every point. Every booklet shows a different part of the set: this one is the valley between the main body and the left bulb, where the seahorses start. Maths can make beautiful things.
